

## Professional Experience

Dr. Geneie Everett has studied and worked in a wide variety of health arenas for 30 years including: clinical nursing, management, hospital planning & design, private consulting and private practice. In addition to her integrative healing practice in Santa Fe, New Mexico, she is a senior assistant for the Foundation of Human Enrichment offering international training in trauma resolution, a trauma consultant to the Akasha Center for Integrative Medicine in Santa Monica, California, a member of the Subcommittee on Integrative Practice to the NM Board of Nursing, and the Chair of the “Hundred Medicines™” conferences.

### 1988-present

Integrative healing practice In her private practice, Dr. Everett integrates a wide variety of mind/body/spirit healing modalities incorporating multiple techniques from western medicine and shamanic cultures. She blends her studies and experience from many fields including: clinical nursing, cross-cultural healing, body-centered psychotherapy, energy medicine, imagery, biofeedback, shamanism, ritual, mind/body counseling, altered consciousness, massage therapy, somatic psychology, spiritual healing, indigenous healing, and Somatic Experiencing®.

### 1979-1989

Hospital nursing As a registered nurse, Geneie worked at the University of New Mexico Hospital (UNMH) in Albuquerque, NM and at Harborview Medical Center in Seattle, WA in several critical care units including: (neuro ICU, surgical & medical ICU, burn & trauma), plus emergency and hi-risk OB. She also worked on the renal transplant team at UNMH with donor identification, family support, and organ procurement. Geneie served as the Head Nurse of the Surgical Intensive Care and Coronary Intensive Care Units at the University New Mexico Hospital, Albuquerque, NM. Her nursing management position included full staffing, management, operations and budgetary responsibilities for 100+ employees.

### 1984-1992

Hospital design and planning consultant Dr. Everett worked throughout the Southwest and Canada in hospital planning and design, architectural programming, special studies, post-occupancy evaluation, materials management systems, and intercultural facility planning. Her consulting experience included: marketing, project development, proposals, planning, design, presentations, budget development and overall project management.
